- Work as part of the support service team to ensure we meet our SLA targets
- Your day to day tasks will involve deploying racks, configuring servers, running and terminating network cables, performing tape changes etc
- Resolving customer routine issues via ticket/telephone and escalating support requests whenever necessary
- You will be remote hands for our clients when required
- Adherence to Datacentre operational processes
- Installing and modifying data floor equipment in line with company standards, e.g., racks, switches, power bars, controllers, making, terminating and testing cables etc
- Server configuration and network support/administration
- Updating asset management systems and stock control systems
- Managing Backups
- Monitoring networks and servers
- Managing tasks in the Datacentre environment and liaising with maintenance personnel
- Managing tasks in the DC and liaising with support engineers to troubleshoot physical issues

Previous Roles May Include

- Junior IT Systems Engineer
