

iomart

Complete Cloud Solutions

Global Data Centres

Glasgow, London, Nottingham, St Asaph, Leicester, Maidenhead, Gosport, Manchester, Los Angeles, Boston, Dallas, New Jersey, Virginia, Sacramento, Dubai and Singapore – managed 24 x 7 by onsite Technical Teams.

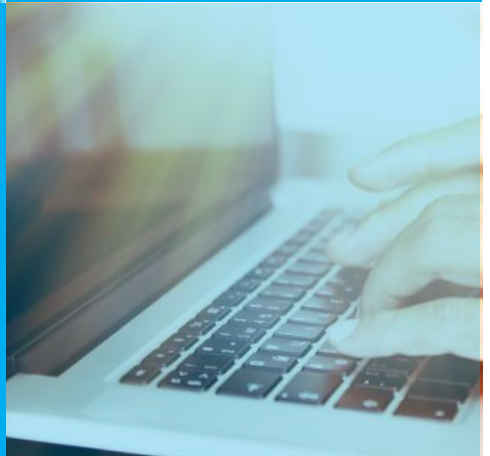

UK Fibre Connectivity

Without a resilient and secure network, the most advanced web applications, server infrastructures and cloud environments are constantly at risk. We route over 20 Gigabits per second of traffic at peak times and have over 100 Gbps of internet capacity available at any time.

Total Control

With our Cloud Control Panel you have instant access to your iomart services at all times. Administer your account, check billing and payment records, set user permissions and manage all your services including your entire hosting infrastructure from a single location. Our integrated support ticketing systems allows you to contact our technical teams whenever you need to, streamlining your entire Cloud experience.

DDoS Protection

Advanced, automated DDoS threat detection and mitigation. We've partnered with Arbor Networks, one of the world's leading providers of DDoS protection technology, to offer cost-effective protection of your networks from attack.

Colocation

Cost-effective way to house your server infrastructure within our state of the art UK data centres. Our robust infrastructure can easily scale to meet demand, providing a reliable service fully supported by our onsite teams. With our high speed connecting fibre network and uptime guarantee, we offer (and deliver) some of the best SLAs available.

Network Services

Comprehensive range of network services maximise the benefits and features of our cloud solutions. From high speed and high volume MPLS IP-VPN to IP Transit, Direct Ethernet Connection and Content Delivery Networks, our technical account teams will work with you to optimise the performance of your services

Cloud Backup

Using enterprise grade EMC Avamar, Data Domain and VMAX platforms, we offer the most robust and secure backup solutions for both physical and virtual environments. Application aware agents deployed to each network endpoint (laptop, desktop, server etc.) and backup schedules and configuration managed through iomart's proprietary secure web accessed control panel.

Cloud Storage

Secure and intelligent protection for your valuable data assets. Range of solutions available to perfectly suit your requirements; from File Sync & Share providing enterprise-grade solutions to low cost bulk object storage to protect large IT estates. Unlimited storage capacity, fully flexible and scalable to meet your changing needs.

Storage Archiving

With military grade encryption available and multi-site, multi-user options, these solutions deliver instantly accessible, simple to use and scalable options for any organisation make up. Based on technologies from the world's leading storage companies, these are robust, resilient solutions that provide the most advanced security and flexibility available.

Disaster Recovery as a Service

Working seamlessly and unobtrusively with the Cloud Backup solution, our DRaaS solution provides an effective safety net and complete peace of mind. Managed simply through our online control panel, we can rapidly restore your business critical data, spinning up virtual servers to get you back up and running as soon as possible, minimising revenue loss and protecting your customers and reputation.

Hosted Virtual Desktop

Taking your office to the cloud, our VMware View based Hosted Virtual Desktop (VDI) delivers all your desktop services direct from our cloud, enabling your workforce to access business applications and data anywhere, at any time, through any internet connected device.

Cloud Email

Complete enterprise grade Business Mail email and collaborative message services delivered in the cloud. Based on the OpenXchange platform. Easy to use, highly available and cost effective, designed for today's communication needs and backed by guaranteed SLAs.

Hosted Exchange

The feature-rich Microsoft Hosted Exchange platform comes packed with all the features and functionality you'd expect from one of the most popular mail solutions in the world. Hosted within our data centres, this email solution is secure, resilient and backed by our impressive SLAs.

Office 365

With Office 365 from iomart you can get work done from virtually anywhere. Everything you need on the devices you use most – your documents, email, calendars, contacts and team sites all come with you. Automatic updates, document access control and collaboration across devices mean you're always working on the latest version.

Managed Amazon Web Services

All the features and benefits of an AWS hosting solution backed by the support infrastructure and management expertise of iomart. Fully Amazon qualified technical account managers will work with you to develop collaborative and bespoke specification to fit your needs from pure AWS to hybrid solutions or anywhere in between.

Bare Metal Cloud

Raw power with guaranteed computing performance. Tier 1 hardware racked and ready to go. Simply deploy your preferred range of computing options to create your perfect cloud solution with the entire server compute power for your sole use – perfect for meeting high compute power demands.

CloudSure Managed Cloud

The ultimate enterprise cloud experience – designed to deliver outstanding reliability and results. Fully managed shared hardware platform delivering flexible and elastic cloud solutions from on demand virtual servers and storage. Highly available platform backed by our secure infrastructure and SLAs.

CloudSure Hybrid Cloud

The perfect solution for organisations with a need to strictly control core elements of their IT network, but who can benefit from extending into a secure cloud environment. Blended mix of physical servers and cloud solutions, fully secure and accredited, allowing you to develop complex and bespoke architectures to exactly fit your needs.

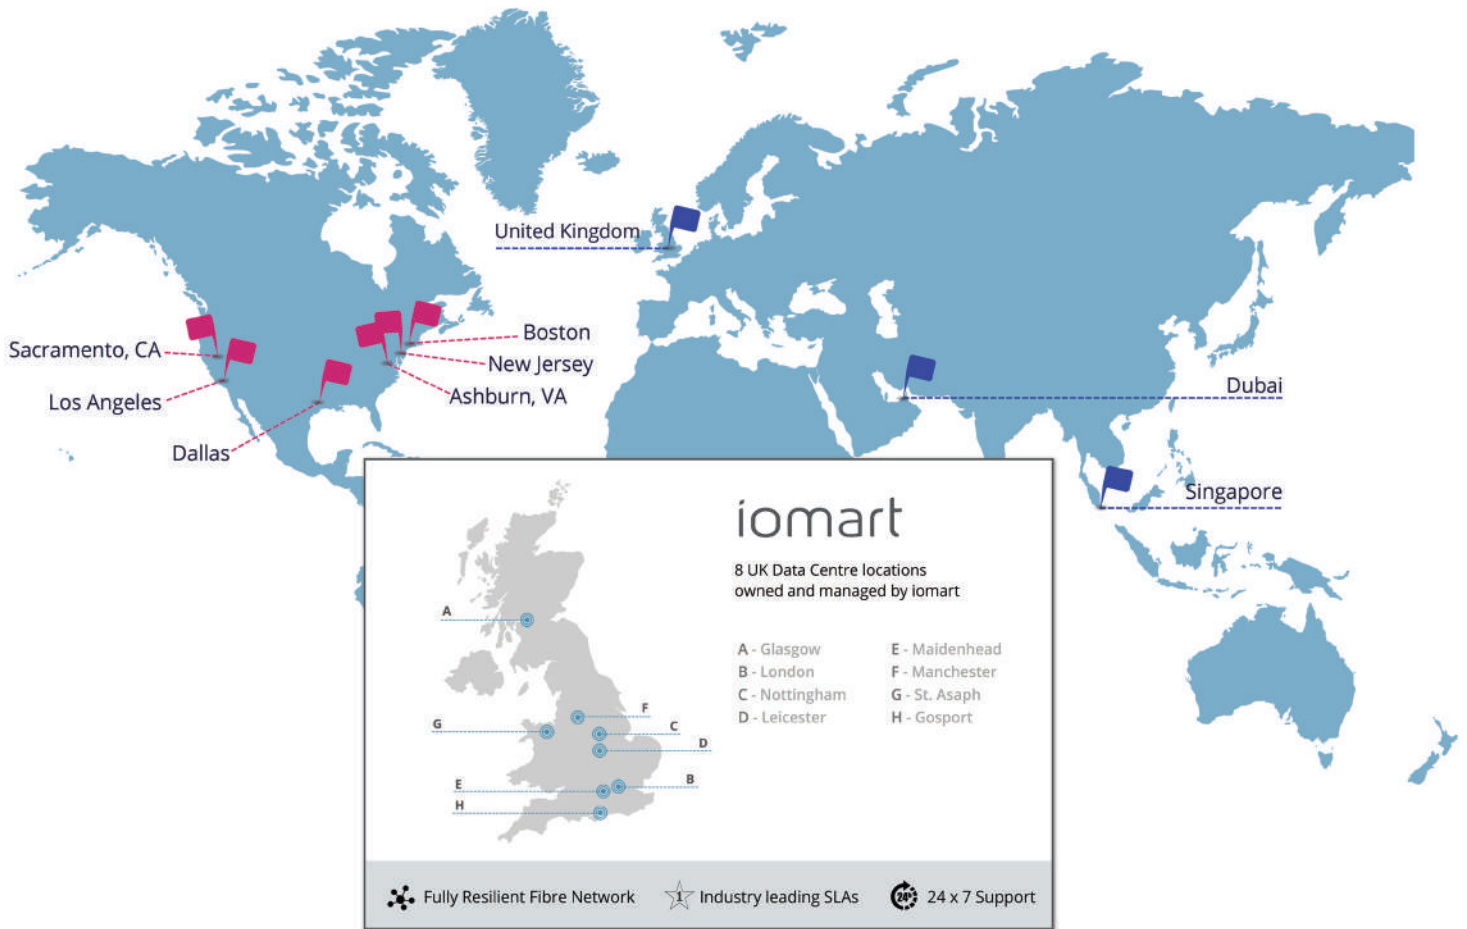

CloudSure Private Cloud

Dedicated infrastructure, platforms and software in an easily managed and cost effective solution. The perfect solution to even the toughest security challenges, meeting the strictest legal and regulatory concerns. This provides a dedicated resource in the cloud without losing the protection or security of an on premise solution.

Why we're one of the World's leading Cloud Companies

Each iomart data centre is fully powered, secure, resilient and newly equipped to handle the demands of current computing trends such as high density computing, energy conservation, distributed storage and multi site disaster recovery.

We open up a whole world of cloud computing options, offering a range of cloud services, across a global network, managed and supported by us 24x7.

Any Cloud. Your Way
whatever your cloud needs talk to us first
