

Project Manager - Top 3 Managed Cloud Computing Company

Vacancy Title

Project Manager, South-East UK - Top 3 Managed Cloud Computing Company

Systems Up

SystemsUp is part of the iomart Group which is one of the Top 3 Managed Cloud Computing Companies in the UK. We are a premier Microsoft Gold Partner and a member of the prestigious Global Black Belt team for Azure BCP/DR. SystemsUp is also a select premium partner of Amazon, VMware and Google Cloud Platform.

SystemsUp is a dedicated Public Cloud services provider. We are a technically led, commercially minded company that delivers business benefit using IT transformation as a platform offering obligation free services to all new clients. SystemsUp is a specialist IT technical consultancy, with wide ranging skills covering areas such as Cloud Services, Virtualisation, Business Continuity, Storage and Security. We are also Government GCloud approved, security cleared and specialist Cloud service supplier.

SystemsUp is a leading Public Cloud Solutions Architects and has been recognised as such by being admitted to the Azure Circle Partner program. We are also an Amazon Web Services Authorized Government Partner and Google Cloud Platform Partner. In addition to these prestigious partnerships we are a white label services supplier to VMware and Microsoft Professional Services.

We are fully agnostic and use an objective weighted cost model assured CloudEconomics™ to identify best value placement of workloads. We sell no hardware or software so you are guaranteed the best solution with no conflicts of interest.

We are delighted to offer this opportunity to join one of the UK's leading managed hosting companies based in London or the South East.

Role Description

The role of the Project Manager is one of great importance within SystemsUp and requires a strategic mind-set as well as attention to detail. A broad understanding of multiple technologies would be a great advantage.

The objective of the Project Manager is to manage a team of SystemsUp technical staff in order to ensure delivery of the technical solution to time and cost.

The Project Manager will hold recognised qualifications such as Prince2, PMP, Scrum, Agile. Flexibility and agility must be a part of the personal skills as well as a proper understanding of correct project processes and adherence to quality principles.

Typically, there will be a hand-over from the pre-sales stage of customer engagement from the SystemsUp team. The Project Manager will be responsible for the full end to end delivery of the project. This will start with formal project kick off, preparing appropriate documentation which highlights the project deliverables and standard processes such as RAID, change and timescales.

Skills/Experience

- Experience in project management and delivery of Microsoft Azure or AWS projects.
- Recognised Project management qualifications such as Prince2, PMP, Scrum, Agile.
- 5 years plus relevant experience in a consultancy focussed organisation.
- Solid organizational skills including attention to detail and multi-tasking skills
- Commercially aware with strong client facing and relationship management skills
- Budgeting and analysis skills
- Excellent communication, presentation and documentation skills.
- Experience in working with technical delivery teams
- Team player but with the ability to work unaided
- Professional appearance and manners
- Positive and constructive attitude in all work related matters
- Strong hand-on technical capability
- Strong time management skills

Key Responsibilities

- Liaise with Pre-Sales teams for internal handover of projects from Sales to Delivery
- Management of the delivery of the project solution, liaising closely with the Lead Technical architect, to ensure projects are delivered on time and to budget
- Formal project kick-off workshop
- To develop a good working relationship with customers for the duration of the project lifecycle, to establish governance, confirm understanding of deliverables, agree reporting procedures/processes and communications plans that will be implemented in order to successfully deliver
- Preparation of appropriate project documentation such as Project Initiation Document (PID), RAID logs as well as development of detailed project plans and tracking of progress
- Work with internal SystemsUp teams to ensure project resources are scheduled against project plan timelines
- Perform risk management to minimize project risks
- Establish and maintain relationships with third parties/vendors
- Use appropriate verification techniques to manage changes in project scope, schedule and costs
- Maintain internal SystemsUp reporting processes, liaising with internal teams and Consultancy Director to report financials against each project and escalate issues where appropriate
- Maintain knowledge of project delivery methodologies and in-depth knowledge of industry standards relevant to the role
- To adhere to all company policies and processes as communicated by line management in order to maintain corporate ISO accreditation levels
- To obtain and maintain accreditations as required by management
- Act as a mentor in leading and developing other team members to impart best practice regarding project management principles
- At all times to provide a courteous service and professional approach to customers and to the delivery of allocated tasks as required
- To perform any other duties which, from time to time may be allocated by your Team Leader/Manager

Please note that successful applicants must have the right to work in the UK by the start of their employment. We do not sponsor work visas
